MATTE

Collection

Pando Matte Collection is an exclusive range of premium kitchen appliances that redefines contemporary elegance through a sophisticated matte finish. Designed to create harmonious, timeless spaces, it brings together **ovens, extractor hoods, induction hobs, induction hobs with integrated extraction, and wine coolers** under a single aesthetic language, creating a consistent and refined visual experience.

Each product combines innovation, **advanced technology, and outstanding performance** to deliver an exceptional user experience. Its clean lines, high-quality materials, and meticulous attention to detail make **Pando Matte Collection** the perfect choice for kitchen projects seeking the ideal balance between **design and functionality**.

Created for those who value **interior design, exclusivity, and excellence**, this collection offers an understated yet elegant aesthetic that blends naturally into any space. **Pando Matte Collection** represents a new way of experiencing the kitchen: **more sophisticated, more harmonious, and designed to stand the test of time**.

MATTE

Collection

MATTE GLASS

ELEGANCE THAT ENDURES

Every product in the **Pando Matte Collection** has been designed to complement the others. **Ovens, extractor hoods, hobs, and wine coolers** share the same aesthetic vision, creating **elegant, seamlessly integrated compositions**.

The **exclusive matte finish** brings the entire collection together with a sophisticated, timeless presence. In addition to **minimising reflections, fingerprints, and the appearance of scratches**, its surface helps preserve the collection's beauty day after day, maintaining the kitchen's visual **harmony** even with everyday use.

A collection where technology, **design, functionality, and durability** come together in perfect balance to create unique, refined kitchens designed to stand the test of time.

MATTE

Collection

UP TO 5 TIMES MORE SCRATCH-RESISTANT THAN CONVENTIONAL CERAMIC GLASS

Preserves the surface's beauty and flawless finish, even with intensive daily use.

PROTECTION AGAINST WEAR

Up to 10 times greater protection against visible scratches than glossy ceramic glass.

ENHANCED DURABILITY

Designed to retain its beauty over time.

ANTI-FINGERPRINT EFFECT

Reduces the visibility of fingerprints for an impeccably clean finish.

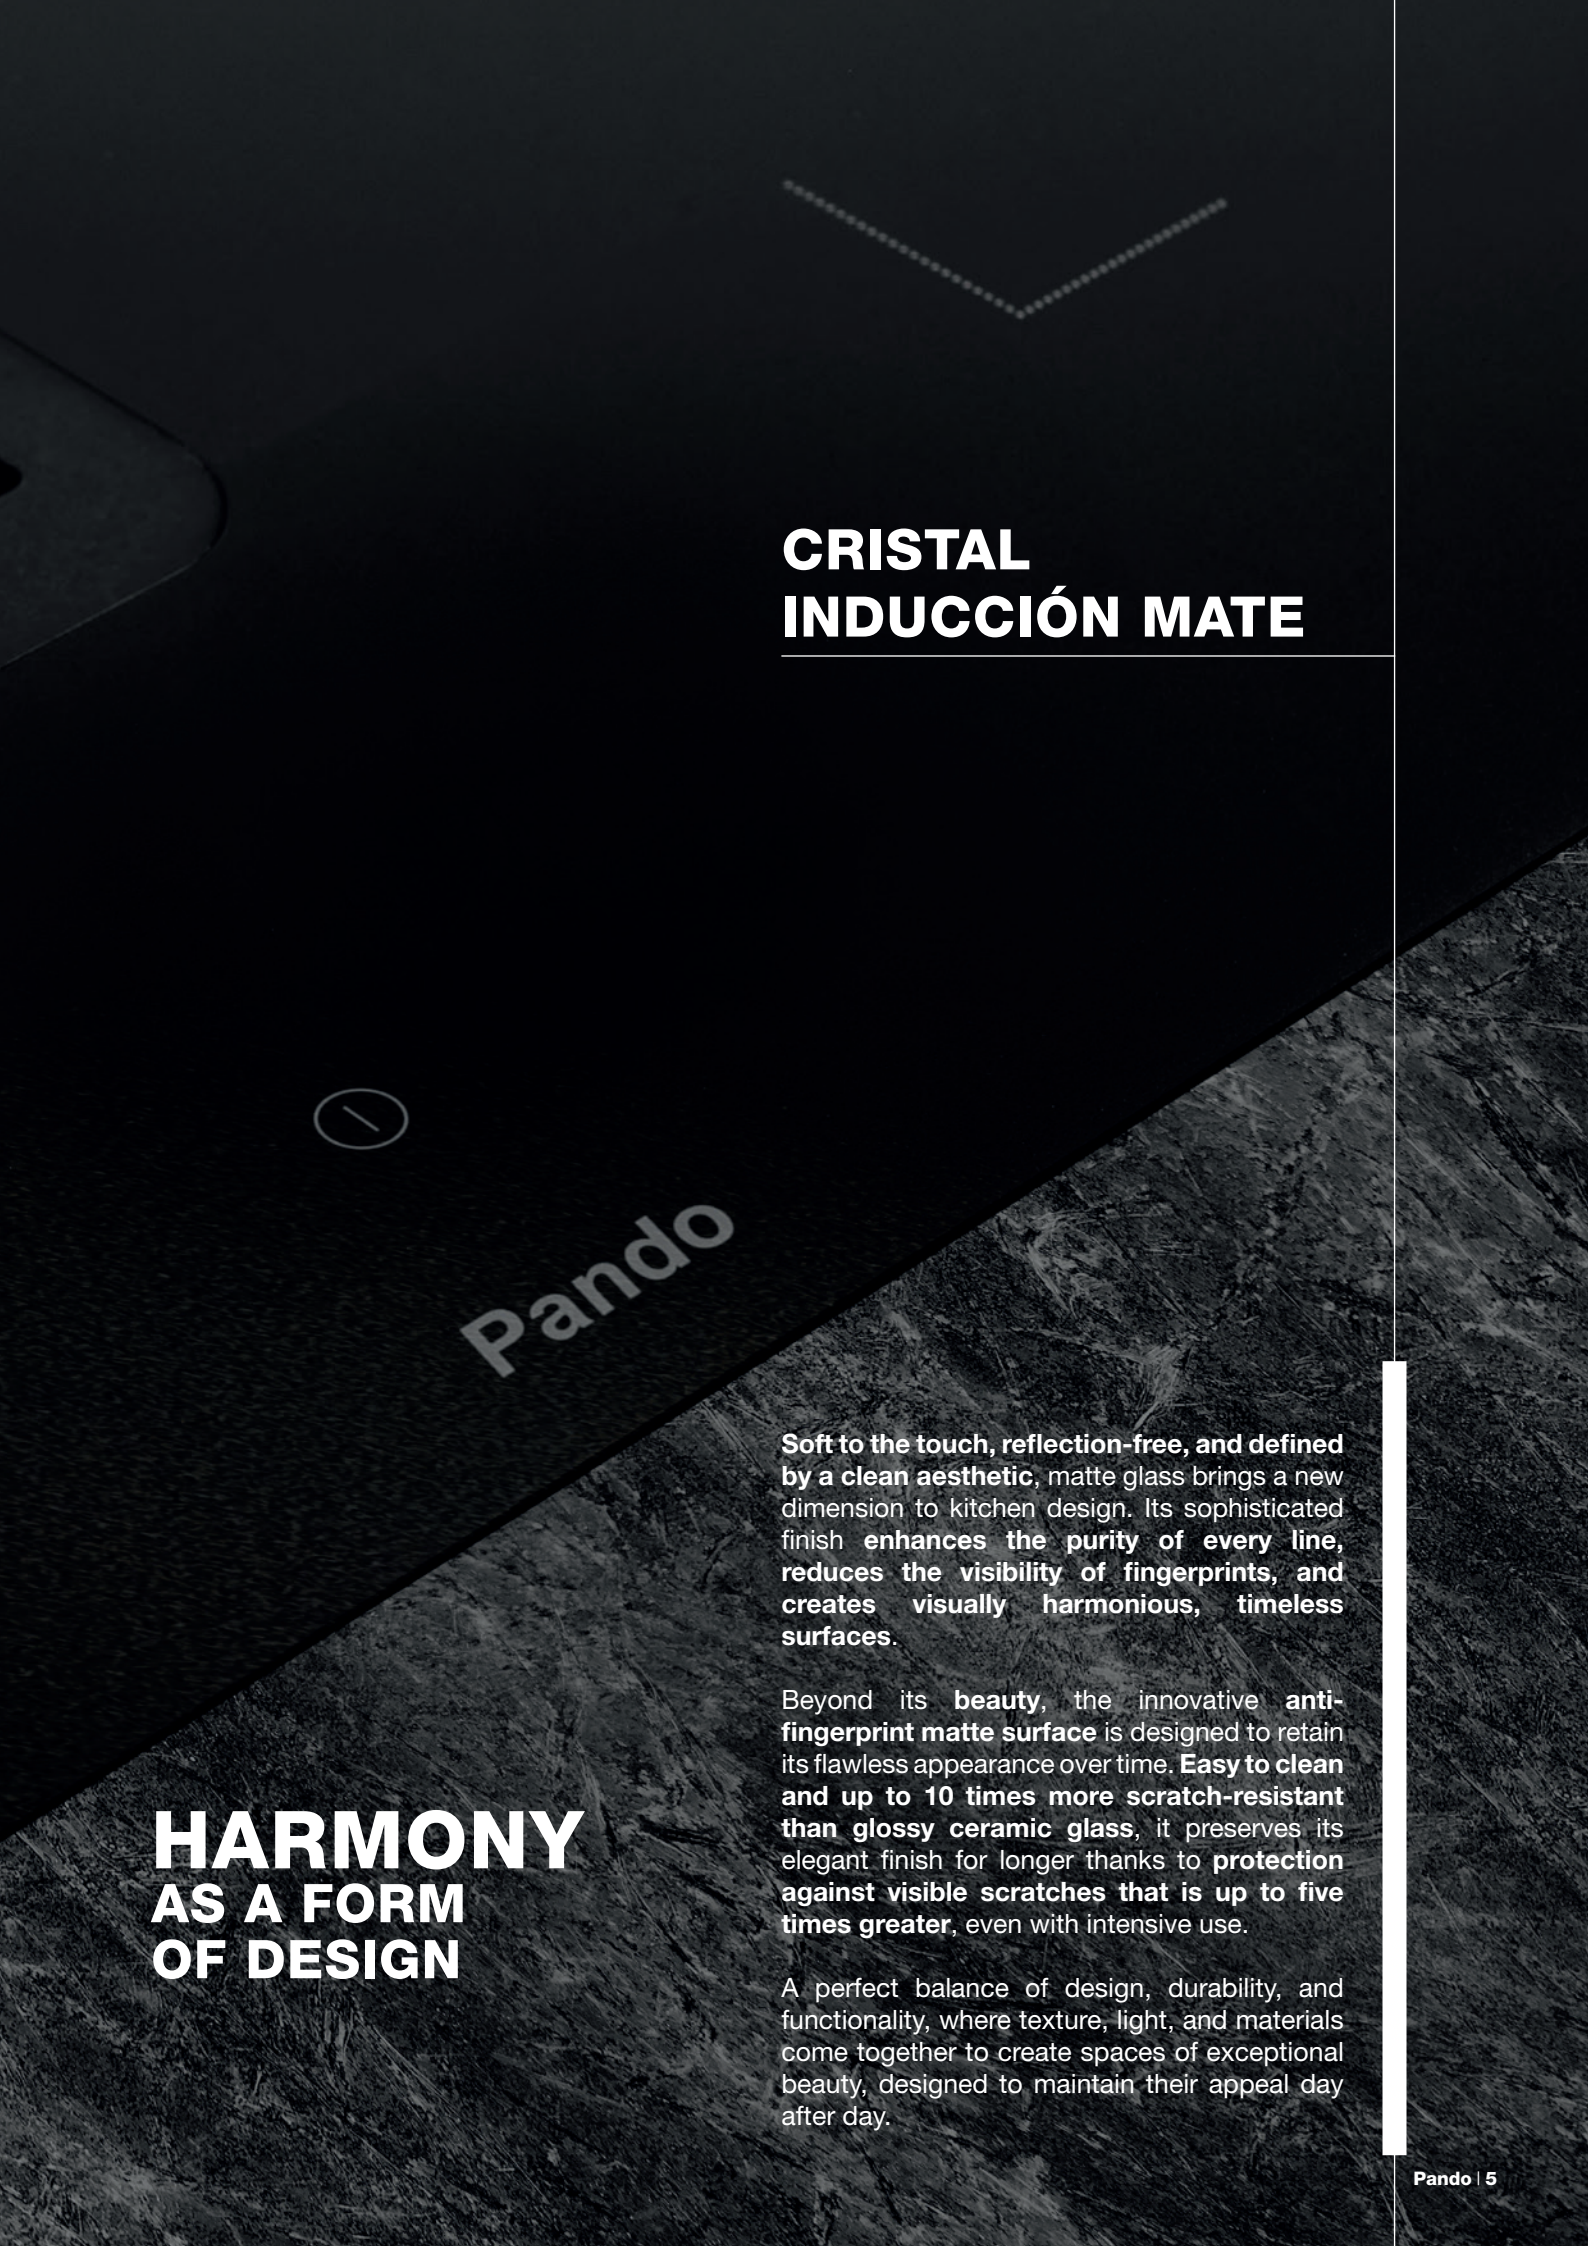

REFLECTION-FREE ELEGANCE

The matte finish reduces reflections and enhances the appearance of the surface.

A GREATER SENSE OF CLEANLINESS

The matte finish enhances a lasting impression of cleanliness and elegance.

CRISTAL INDUCCIÓN MATE

**HARMONY
AS A FORM
OF DESIGN**

Soft to the touch, reflection-free, and defined by a clean aesthetic, matte glass brings a new dimension to kitchen design. Its sophisticated finish **enhances the purity of every line, reduces the visibility of fingerprints, and creates visually harmonious, timeless surfaces.**

Beyond its **beauty**, the innovative **anti-fingerprint matte surface** is designed to retain its flawless appearance over time. **Easy to clean and up to 10 times more scratch-resistant than glossy ceramic glass**, it preserves its elegant finish for longer thanks to **protection against visible scratches that is up to five times greater**, even with intensive use.

A perfect balance of design, durability, and functionality, where texture, light, and materials come together to create spaces of exceptional beauty, designed to maintain their appeal day after day.

**FIVE MATTE RANGES
FOR THE ENTIRE KITCHEN**

The most comprehensive matte range
for creating perfectly coordinated spaces.

MATTE Collection

EXCELLENCE AS A GUIDING PRINCIPLE

Beyond its design, the **Pando Matte Collection** has been created to deliver an exceptional experience. **Innovation, precision, and outstanding performance** are seamlessly integrated into every product, ensuring **reliable, long-lasting results**.

The careful selection of materials and **exclusive matte glass** reflect an unwavering commitment to excellence. Its innovative surface, offering up to five times **greater scratch resistance than conventional ceramic glass**, preserves the beauty and flawless finish of every piece for longer, even under the most demanding everyday use.

A collection designed to endure, where material **quality, durability, and technological excellence** come together to meet the highest demands of the contemporary kitchen.

MATTE Collection

Ovens

General Features

Touchscreen display Precision in every detail

The new TFT touchscreen transforms oven operation into an intuitive, precise and elegant experience. Its interface, customisable in colour or monochrome and available in seven languages, provides easy access to every function and recipe.

The collection **offers up to 120 automatic recipes and 28 cooking functions**, depending on the oven model. It also

allows personalised programmes to be saved as favourites, storing the selected cooking time, temperature and mode for one-touch access.

Technology designed to deliver a sophisticated user experience, where precision and functionality come together in every detail.

Large capacities More space for cooking

More space means greater freedom to prepare all kinds of recipes with ease. The new Pando ovens stand out for their generous interior capacity, designed to offer greater versatility with every dish.

The **60 cm ovens provide a capacity of 81 litres, ideal for preparing several dishes at once or cooking larger items. In the 45 cm range, the multifunction oven offers 53 litres—the largest capacity in its category**—while the combi oven and microwave each provide 35 litres, optimising space without compromising functionality. **More capacity to enjoy cooking without limits.**

Maximum performance and efficiency

A++

3600W

Power and efficiency combine to deliver exceptional performance in every preparation. With up to 3,600 W of power, the ovens in the **Pando Integral Cooking Matte Collection** quickly reach the desired temperature and ensure even heat distribution, optimising cooking times and energy consumption. **Power, efficiency and precision come together to deliver an exceptional culinary experience.**

Maximum convenience for professional cooking

Cooking functions.
Unlimited versatility

Every recipe requires a different cooking method. That is why the ovens in the **Matte collection by Pando Integral Cooking** feature **up to 28 cooking functions**, developed to adapt to all types of dishes with maximum precision.

From convection and fan-assisted conventional cooking modes to specific programmes such as **Pizza, Maxi Grill, Dough Proving, Defrosting, Rapid Preheating and Eco**, as well as steam-assisted functions depending on the model, each option is designed to deliver optimum results and enhance the flavour, texture and quality of every recipe.

A combination of technology and versatility that provides precise control and a premium culinary experience.

reparing any dish is easier thanks to the **more than 120 preset recipes** built into the ovens in the **Matte collection by Pando Integral Cooking**.

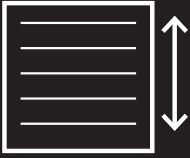

Each recipe automatically combines the optimum time, temperature and cooking mode settings, simplifying the process and ensuring excellent results. Personalised recipes can also be **saved as favourites for quick access**, making it possible to achieve the same result every time with a single touch.

A smart way to cook, where technology adapts to every user.

INTEGRATION TAKEN TO ITS HIGHEST LEVEL

The **perfect combination of induction and extraction** creates a solution in which technology disappears, leaving design to take centre stage. Its **exclusive matt glass surface** enhances the visual purity of the appliance while offering greater resistance to everyday use. It **reduces the visibility of fingerprints, makes cleaning easier and shows up to five times fewer visible scratches than a conventional ceramic hob**, preserving its elegant finish for longer.

Designed for the most contemporary spaces, **Pando Matte Collection** hobs with integrated extraction combine innovation, performance and maximum integration. The exclusive matt finish delivers a **sophisticated, timeless aesthetic that remains pristine over time, helping to preserve the visual harmony** of the kitchen and providing an experience in which **design, functionality and durability** coexist in perfect balance.

MATTE Collection

UP TO 5 TIMES MORE SCRATCH-RESISTANT THAN CONVENTIONAL CERAMIC GLASS

Preserves the surface's beauty and flawless finish, even with intensive daily use.

PROTECTION AGAINST WEAR

Up to 10 times greater protection against visible scratches than glossy ceramic glass.

ENHANCED DURABILITY

Designed to retain its beauty over time.

ANTI-FINGERPRINT EFFECT

Reduces the visibility of fingerprints for an impeccably clean finish.

REFLECTION-FREE ELEGANCE

The matte finish reduces reflections and enhances the appearance of the surface.

A GREATER SENSE OF CLEANLINESS

The matte finish enhances a lasting impression of cleanliness and elegance.

E-398/78

S.E.C. System® Interior Motor

Features

Cooker Hood features

- Minimum internal extractor height: 220 mm
- Low-consumption, high-efficiency motor
- Low noise level: 52 dB min. / 72 dB max.
- Excellent extraction speed
- NANOTEC filtration system
- Rear rectangular duct: 220 x 90 mm
- New grille for improved extraction performance

Notas

Incluye bandeja de limpieza fácil que recoge el aceite

Induction Hob Features

- Total power: 7620 W
- Stop&Go function
- Onyka Essential straight-edged matt glass
- Automatic cooking
- Bridge function for combining two induction zones on either side into one large cooking area
- Intelligent pan detection
- Chef function allows the pan to be moved across the hob without losing the selected heat level
- Residual heat indicator
- Booster and Double Booster functions
- Rapid heat-up function

HIGH EFFICIENCY, WASHABLE AND REACTIVATABLE

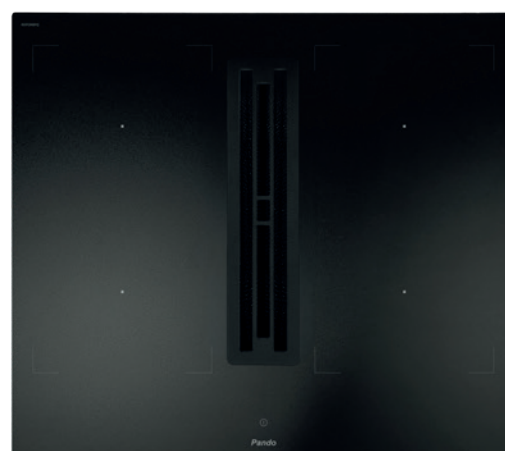

NANOTEC filters deliver excellent performance in recirculation systems. Thanks to their innovative composition, they can be washed in the dishwasher and reactivated in the oven, extending their service life. They contain activated carbon spheres with a density of 2200 g/m², optimising odour absorption and achieving an efficiency of 75%. Their service life exceeds three years, depending on use and maintenance.

Optional*

INDUCTION HOBS

PRECISION TRANSFORMED INTO DESIGN

More than just a cooking surface, Pando Matte Collection induction hobs represent a new way of experiencing the kitchen. Their exclusive matt glass combines an elegant, contemporary aesthetic with exceptional performance: it reduces the visibility of fingerprints, makes cleaning easier and shows up to five times fewer visible scratches than a conventional ceramic hob, preserving its beauty over time.

The purity of their lines and advanced technology create an experience in which every detail has been carefully considered. Power, precision and design come together in a collection created to blend naturally into the most sophisticated spaces, transforming every moment in the kitchen into an exceptional experience.

Interior Motor V.1130

Reversible Door Opening. Rotating Motor Housing
Weight – Model 95: 22 kg / Model 120: 27 kg

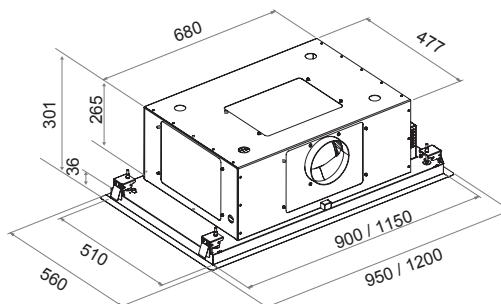

Cut-Out Dimensions

95 cm	910 x 515
120 cm	1160 x 515

Minimum False Ceiling Height

190 mm

Interior Motor V.1250

Cut-Out Dimensions

95 cm	910 x 520
120 cm	1160 x 520

Minimum False Ceiling Height

310 mm

INCLUDED

This model, when fitted with the V.1130 ECO PLUS motor, includes 2 m of circular Ø150 mm spiral extraction duct as standard.

Units fitted with the V.2450 Intermediate External Motor or V.2350 Roof Motor include 5 m of SEC System® extraction duct as standard, with an internal diameter of Ø203 mm and an external diameter of Ø253 mm.

WINE COOLERS

MATTE Collection

THE PLEASURE OF PRESERVATION

More than simply a place to store wine, **Pando Matte Collection** wine coolers embody a vision in which design and experience come together. Their **refined matt glass finish** creates an elegant, understated presence that integrates seamlessly into the architecture of the kitchen.

Designed to preserve and display every collection with the utmost care, they combine **technology, sophistication and harmony** to complete a concept in which every last detail has been carefully considered.

An innovative solution for purifying the air in the kitchen, improving the quality of the environment and eliminating pollutants in an efficient and sustainable way.

INNOVATION IN AIR PURIFICATION

The **Integrated Eco-Plasma System by Pando** is manufactured for hoods designed for 'smokeless' environments and therefore for 'recirculation' use. Its technical architecture consists of an advanced **Hybrid Plasma Ioniser** and **latest-generation Activated Carbon Filters with Very High Operational Efficiency**, capable of **eliminating odour particles** in their first recycling up to **88%** under the UNE-EN-IEC 61591:2023 standard and 99% under the UNE-EN-IEC 13725: 2022, it also neutralises pollutants such as bacteria, viruses and allergens, creating a cleaner and healthier environment in your kitchen.

BIPOLAR IONISATION TECHNOLOGY

The patented purification system from **Pando Integral Cooking** uses **Bipolar Ionisation**, emitting positive and negative ions similar to those found in nature. These ions trap particles, improving respiration, well-being and metabolic activity, purifying and refreshing the air by eliminating pollutants.

BENEFITS OF IONISED AIR

- **Better rest and well-being:**
Increases energy levels, reduces stress, improves mood and contributes to restful sleep.
- **Acceleration of the metabolism:**
Promotes tissue regeneration helping in the treatment of respiratory diseases.
- **Boosting of the immune system:**
Improves the oxygenation of tissues and organs, strengthening the body's defences.
- **Cleaner and healthier air:**
Reduces the presence of pollutants, germs and viruses in the environment, guaranteeing a safer environment.
- **Free of aggressive chemical products:**
The purification process doesn't use wet substances and leaves no residue.
- **Use of non-toxic and accessible air or gases:**
It uses safe, affordable components that are free of harmful substances.
- **Environmentally friendly:**
A clean, sustainable technology that is free of harmful emissions (zero ozone).

KEY FEATURES OF THE INTEGRATED SYSTEM ECO-PLASMA BY PANDO

Zero maintenance of the Plasma Ioniser:

Thanks to its patented self-cleaning ion emitters.

Greater durability of the filters:

With a use of more than three years 'depending on the type of cooking', the **Activated Carbon filters** have a **Very High Operational Efficiency** and are also dishwasher-safe and reusable in the oven.

Energy efficiency:

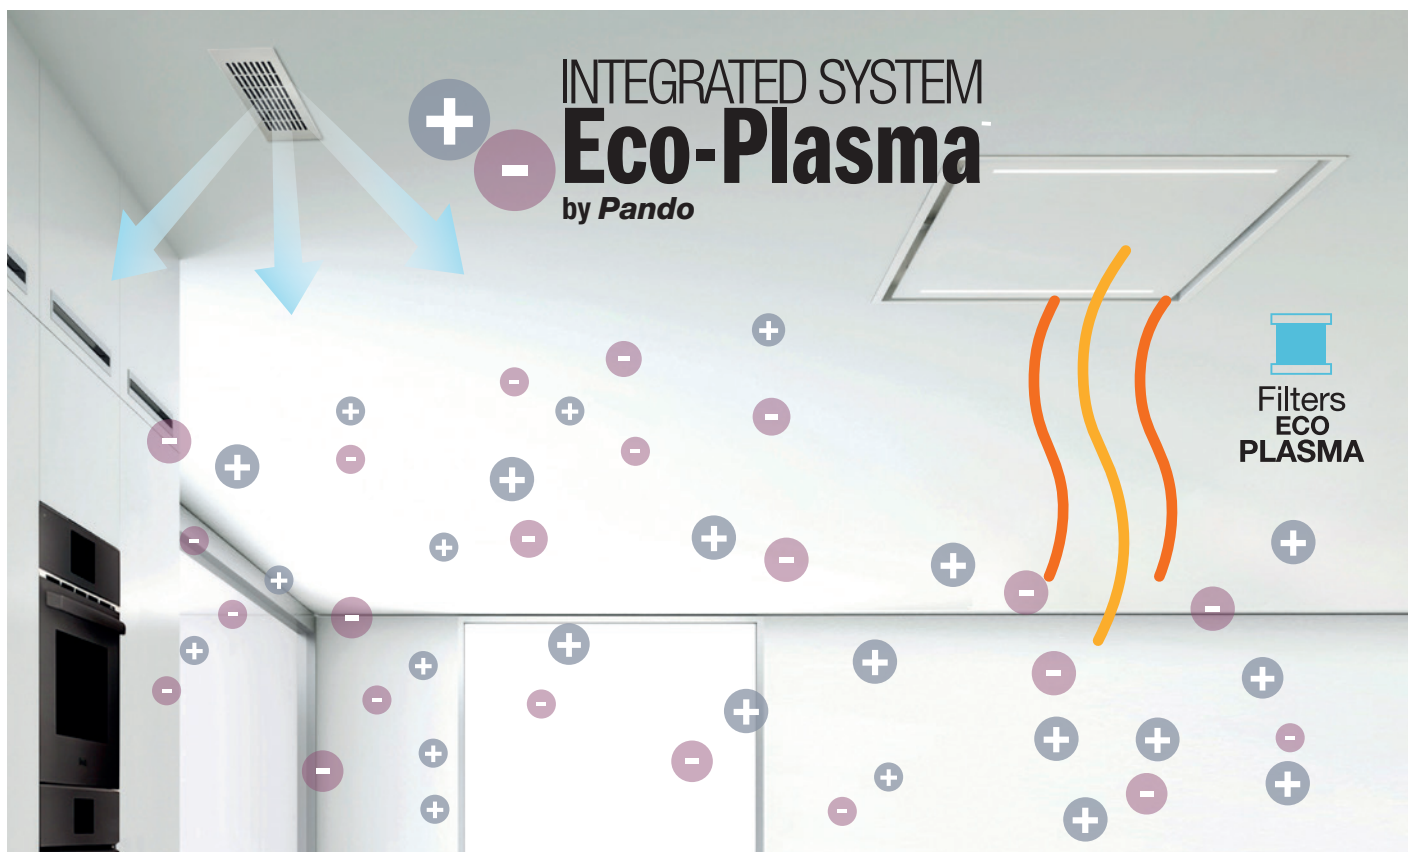

Minimises the need to expel air to the outside, saving on heating and air conditioning.

Extended life:

Around 50,000 hours of operation (the equivalent of more than 35 years of use) with an estimated average daily consumption of the hood of 4 hours a day.

Guaranteed safety:

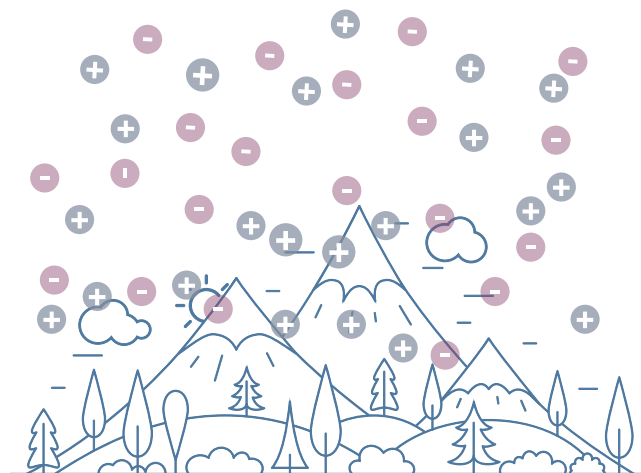

Validated for zero ozone emissions.

ION DENSITY IN BUILDINGS <300 IONS/cm³

ION DENSITY IN NATURAL ENVIRONMENTS <1700-25000 IONS/cm³

Eco-Plasma by Pando is a cutting-edge hybrid INTEGRATED SYSTEM that eliminates odours, improves air quality and is totally respectful of the environment.

MAXIMUM EFFICIENCY AT HOME

Unlike other systems, the Integrated Eco-Plasma System by Pando is not only designed for the kitchen, but also perfectly purifies the air in the room. Its advanced Bipolar Plasma Ionisation technology allows for:

- Purification of the air, eliminating viruses, bacteria, and allergenic/harmful particles.
- Neutralisation of odours, providing a fresh and clean environment.
- Elimination of contaminants on surfaces, improving the hygiene of the environment.
- Reduction of suspended dust, facilitating its elimination.

It is an 'optional' system that can be integrated into almost all models of Pando Hoods. Its innovative plasma technology is a system capable of disinfecting and sterilising environments, providing a healthier home free of contaminants.

ENVIRONMENTALLY FRIENDLY INNOVATION

Thanks to its integration into the hood, Eco-Plasma by Pando offers a sustainable and energy-efficient solution, without generating waste or harmful emissions ('O' Ozone).
